

## Espai Columba Andorran Medieval Art

It's a cultural facility whose mission is to conserve and exhibit different sets of mural paintings and liturgical objects from Andorran churches. It is a centre for disseminating knowledge of Romanesque and medieval painting in Andorra without forgetting the architectural context and other artistic manifestations that formed part of the divine universe of this artistic style. A visit to the Espai Columba is the perfect complement to a visit to the church of Santa Coloma, one of the most representative examples of the architecture from this period.

In the church there is a projection, a magnificent audiovisual show that allows visitors to live an experience that will take them back to the original interior of the church.
